I. Introduction

A. The plan for testing all the software artifacts is to have a predetermined input data for each test case. When the a significant function of the program is finished, then we will go through the applicable test case to see if the expected results line up. We will record the actual output and the execution summary and determine whether any further steps are required to fix any part of the system.

II. Test Plan

A. See

III. Testing Deliverables

- A. Test Designs
- B. Test Procedures
- C. Test Logs
- D. Test Incidents Report
- E. Test Summary Report

IV. Environmental Requirements

- A. Hardware required
 - 1. Computer
 - 2. Monitor
 - 3. Keyboard and Mouse

V. Staffing

A. Every group member can test accordingly when each part of the system is done. The test log will be updated when this occurs.

VI. Schedule

A.

Test Case	Expected Date for Deliverable(Due Date Dec 9)
01_001	11/10
01_002	11/10
01_003	11/17
01_004	11/17

02_001 11/23 02_002 11/23 02_003 11/23 02_004 11/23 02_005 11/23 02_006 11/23 02_007 11/23 02_008 11/23 03_001 11/20 04_002 11/20 04_003 11/31 04_004 11/31 04_005 11/31 04_006 11/31 04_008 11/31 04_009 11/31 04_009 11/31 04_010 11/31 04_011 11/31 04_012 11/31 04_013 11/31 04_014 11/31 04_015 11/31

05_001	12/04
05_002	12/03

VII. Risks and contingencies

- A. Program is accidentally deleted locally
 - 1. Frequently backup the program at github
 - 2. Keep a USB backup
- B. Requirements are unable to be met by a certain date
 - 1. Have a generous deadline to account for unpredictable circumstances
 - 2. Have group work days for accountability and consistent progress
- C. A requirement needs to be reworked / redone
 - 1. Address with group members and try to rework as fast as possible

VIII. Approvals

- A. Professor Giacalone
 - 1. Professor and supervisor of the project and who we deliver it too.

IX. Document Revision History

A.
